

manroland Inc., North America

May 29, 2009

Dear manroland press user,

manroland has become aware that BEK Systems has gone through some operational structure changes recently. From what is known, BEK has formed a relationship with another industry supplier and expects to continue to fulfill parts orders and support for BEK products.

We are aware that this change may concern you in regards to ongoing support. We want you to know that manroland will now do everything it can to support you going forward as a manroland press user with BEK supplied auxiliary equipment.

manroland is prepared to support you on a first line basis in supplying parts for your BEK systems delivered in the year 2000 to present. manroland is already doing this for some systems.

For system control programming needs, support may be limited to PLC parts only depending to the vintage of the equipment. manroland recommends that you backup your BEK system control programs, if you have not already done so.

Please call the following numbers for support in the areas of:

BEK Parts - 1-800-533-7561 and select Web Parts from the menu.

System Support - 1-800-533-7561 and select Newspaper Service from the menu.

manroland will continue to monitor the situation closely and update you with any additional information.

If you have any questions or would like more information, please feel free to contact me.

Regards,

Mark Sievers
